

# SUMAN BROWS

## MICROBLADING

Using delicate strokes the hand held micro needles manually implant feather weight strokes with a medical grade approved pigmented colour into the epidermis layer of the skin. Commonly described as a superficial tattoo, the results can last upto 12 months.

Perfect for those who want to fill in sparse gaps, create fuller, more voluminous and darker looking brows. Ditch the eyebrow pencils and products and wake up every morning with your dream brows.

The final pigment shade will settle 10 days after application. There is no downtime with the treatment but a follow up appointment is required 6-8 weeks after to top up to ensure the desired look has been created.

2hr / £450  
including  
anaesthetic  
and top-up  
treatment
