

SUMAN BROWS

MICROBLADING

Using delicate strokes the hand held micro needles manually implant featherweight strokes with a medical grade approved pigmented colour into the epidermis layer of the skin. Commonly described as a superficial tattoo, the results can last up to 12 months.

Perfect for those who want to fill in sparse gaps, create fuller, more voluminous and darker looking brows. Ditch the eyebrow pencils and products and wake up every morning with your dream brows.

The final pigment shade will settle 10 days after application. There is no downtime with the treatment but a follow up appointment is required 6-8 weeks after the initial microblading to ensure the desired look has been achieved.
